## ABSTRACT OF THE DISCLOSURE

2  
3 [0018] A device for exercising when partially submerged in water. The device includes a dumbbell  
4 shaped floatation member for providing boyant resistance once submerged underwater. This  
5 dumbbell shaped member can accept extensions on either end thereof. A second dumbbell member  
6 and a second pair of extensions is provided. A third component of the boyancy system is a boyancy  
7 member that would threadably engage both dumbbell shaped members to provide for a barbell  
8 shaped device for submerging underwater and providing boyant resistance for the user to work  
9 against. The pairs of extension may be threadably engaged either end of the barbell member.
